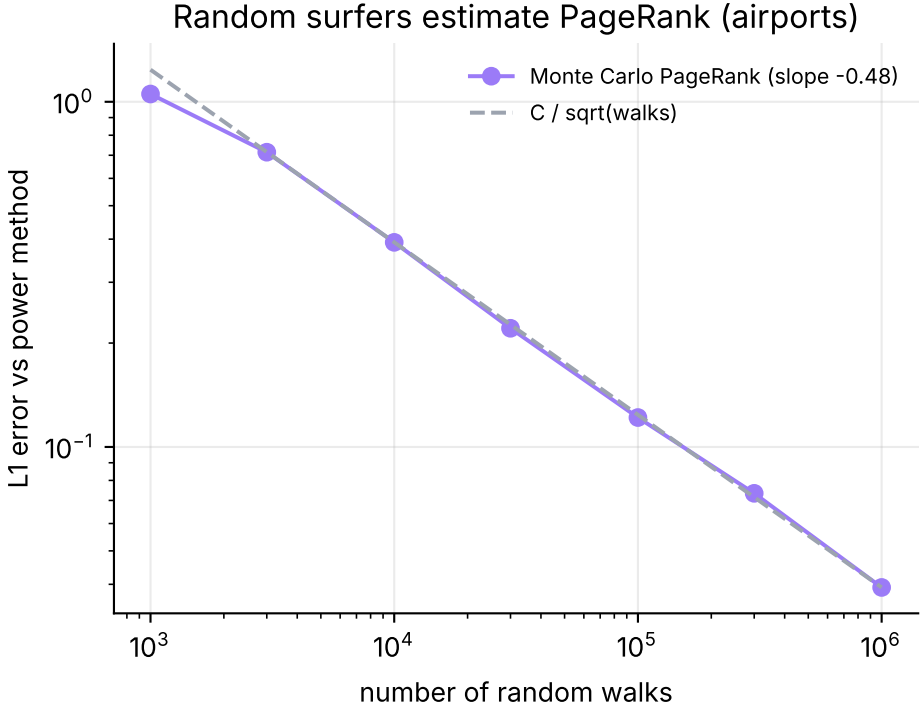
Ergodic theorem: Ehrenfest urn, N = 20
mean over 400 chains (slope -0.51)
C / sqrt(n)
TV(occupation frequencies, pi)
10^{-1}
10^{-2}
10^{2}
10^{3}
10^{4}
10^{5}
trajectory length n



Random surfers estimate PageRank (airports)
Monte Carlo PageRank (slope -0.48)
C / sqrt(walks)
L1 error vs power method
10^{0}
10^{-1}
10^{3}
10^{4}
10^{5}
10^{6}
number of random walks
